

Tuya V3.13.0 App

Manual

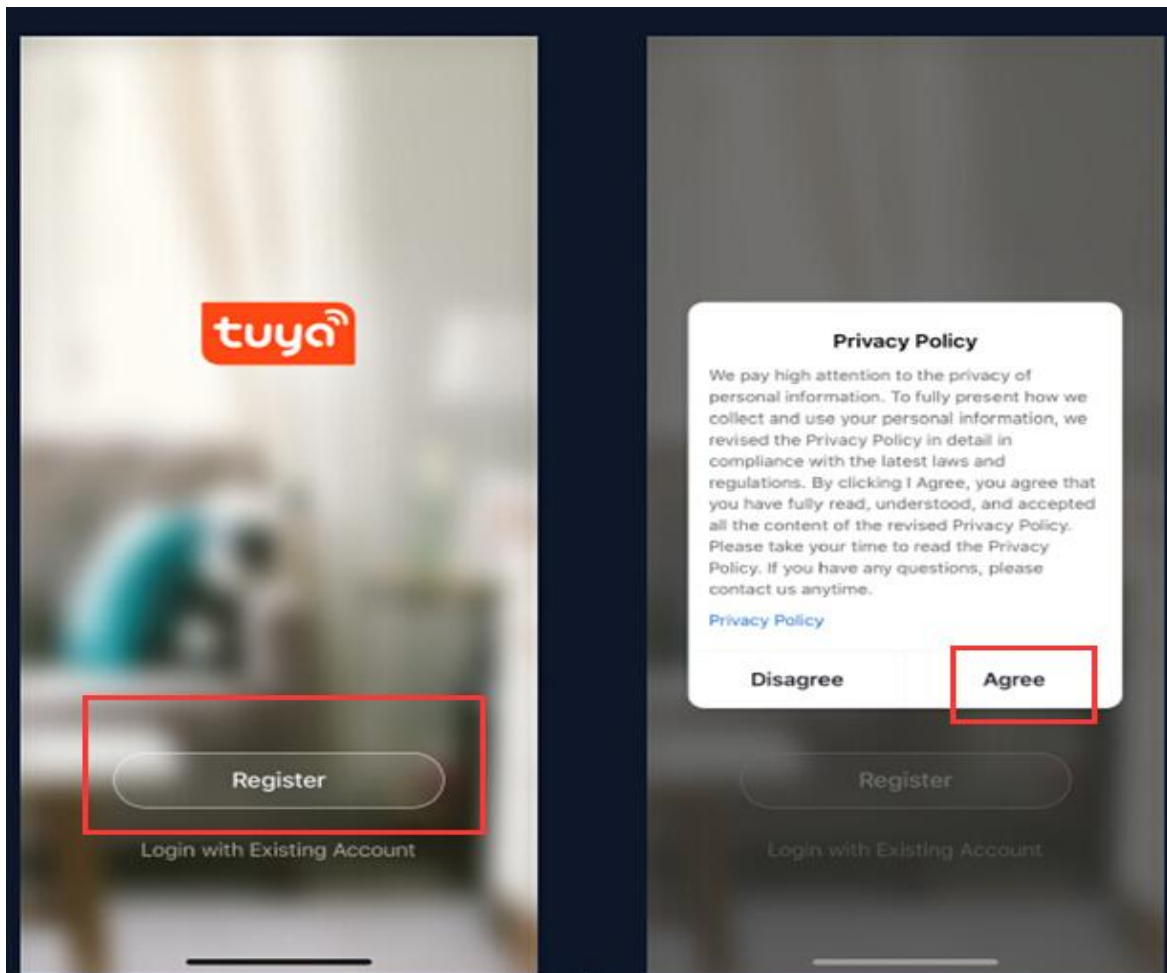

1、 App download

Search “Tuya” in the Apple Store and major application markets or scan the QR code below to download the TUYA Smart app.

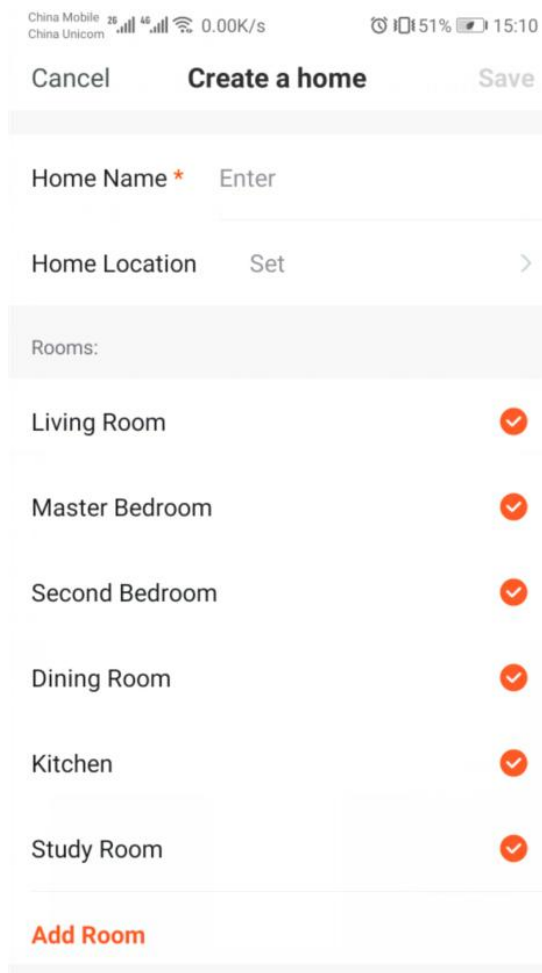

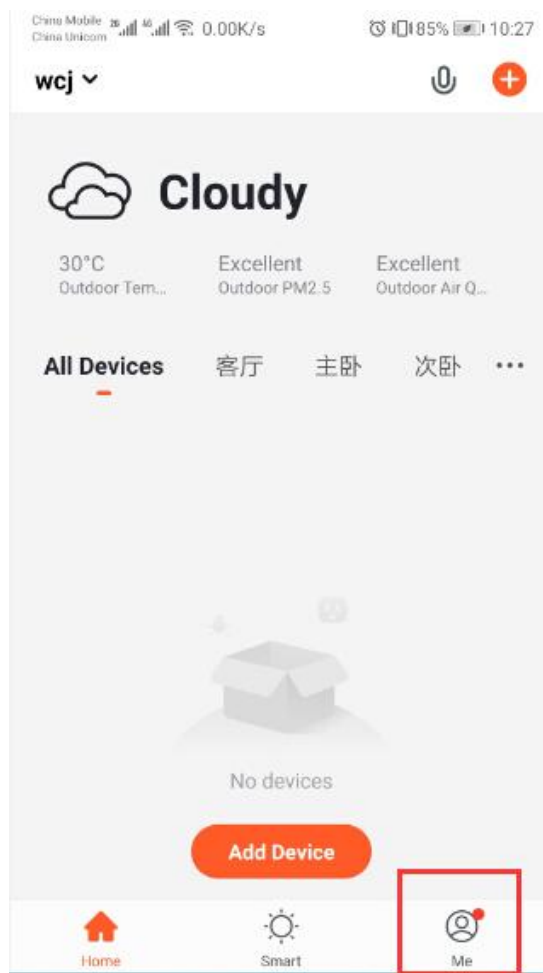

2、 Create a family:

(1) Register and log in to the APP

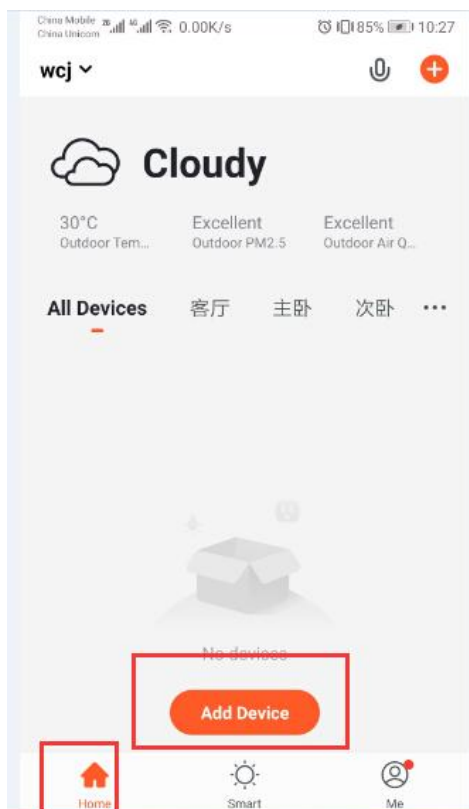

(2) Enter "Me" to "Create a home":

3. Adding Device.

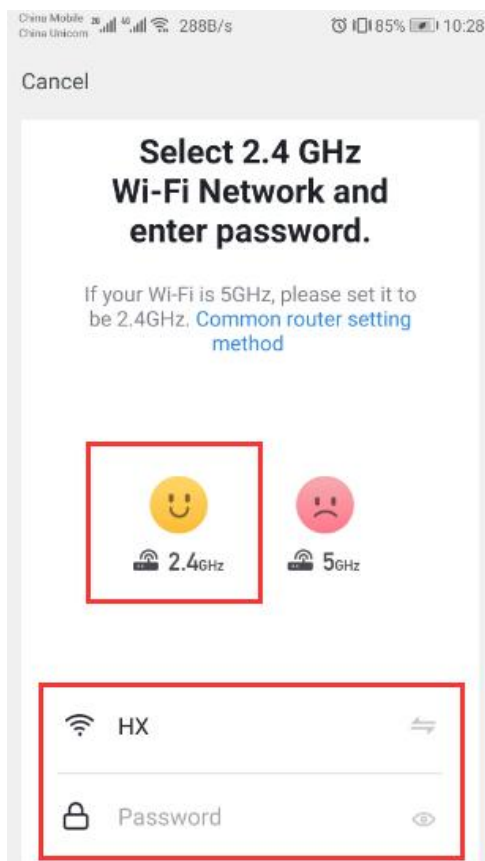

(1) Click " Home" interface, then click the "Add Device" button

(2) Click "Lighting", choose "lighting(Wi-Fi)"

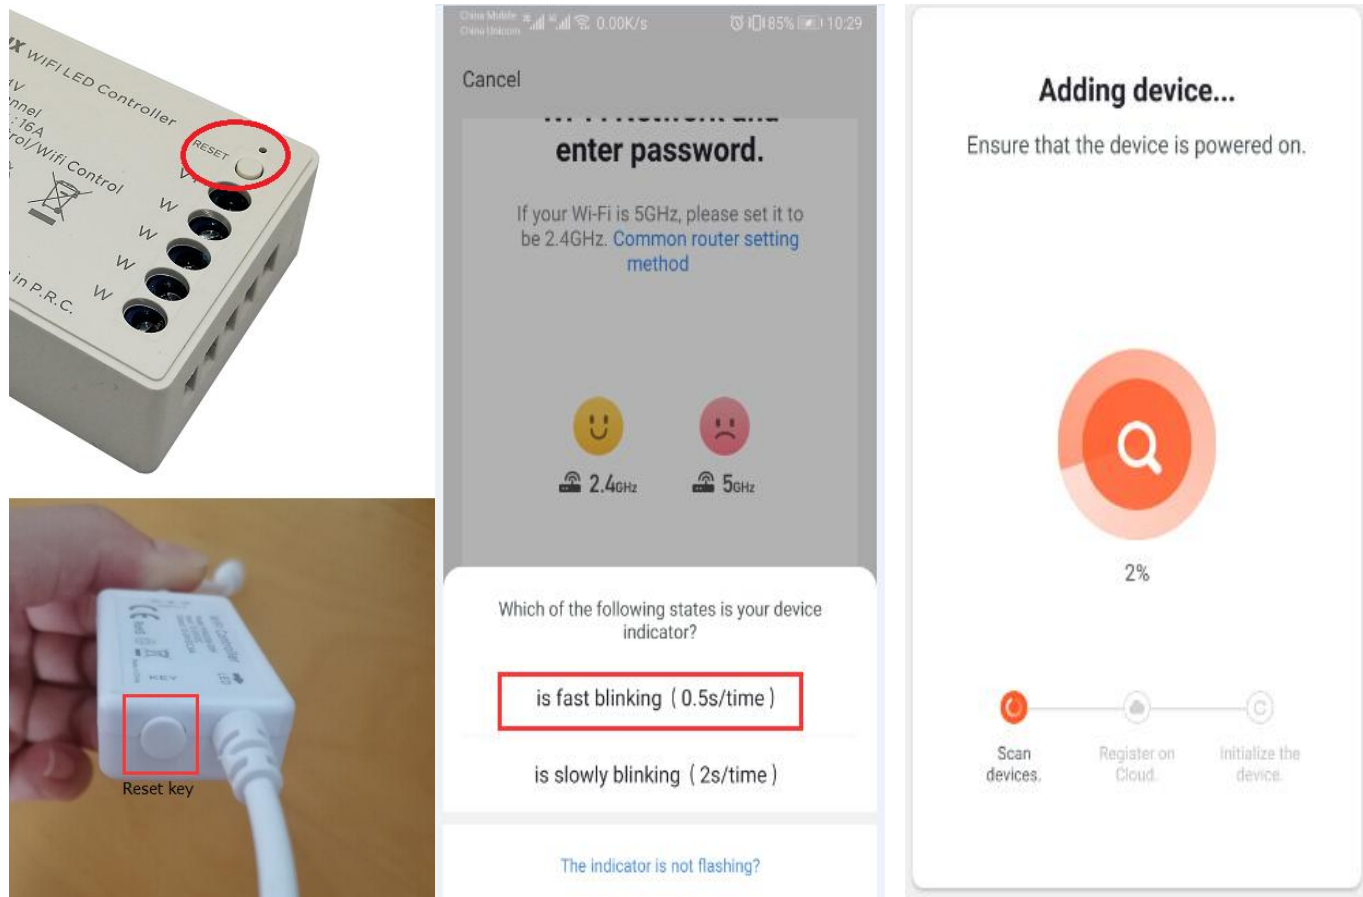

(3) Select "2.4GHz", Enter your Wifi network and password

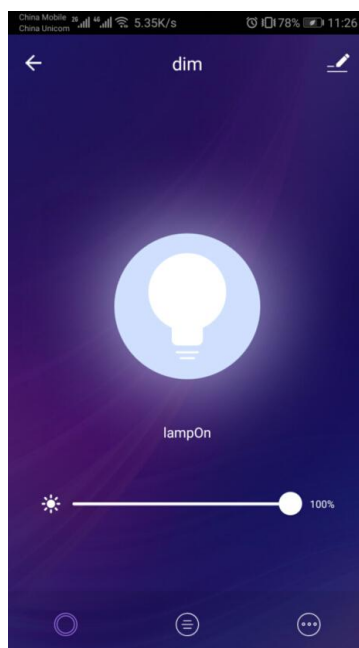

(4) Long press the “Reset” button on the controller until the light flashes, while the light flashing, click "fast blinking (0.5 seconds / time)" on the App, then interface will jump to “Adding advice” page to “scan device”.

Generally It takes about 20 seconds to adding, please take time to wait.

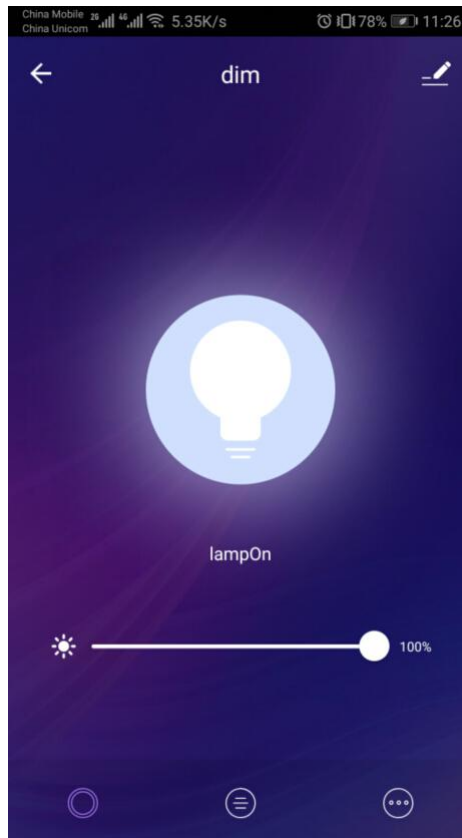

After the adding successful, Interface of APP will jump to the control interface, the device adding finished.

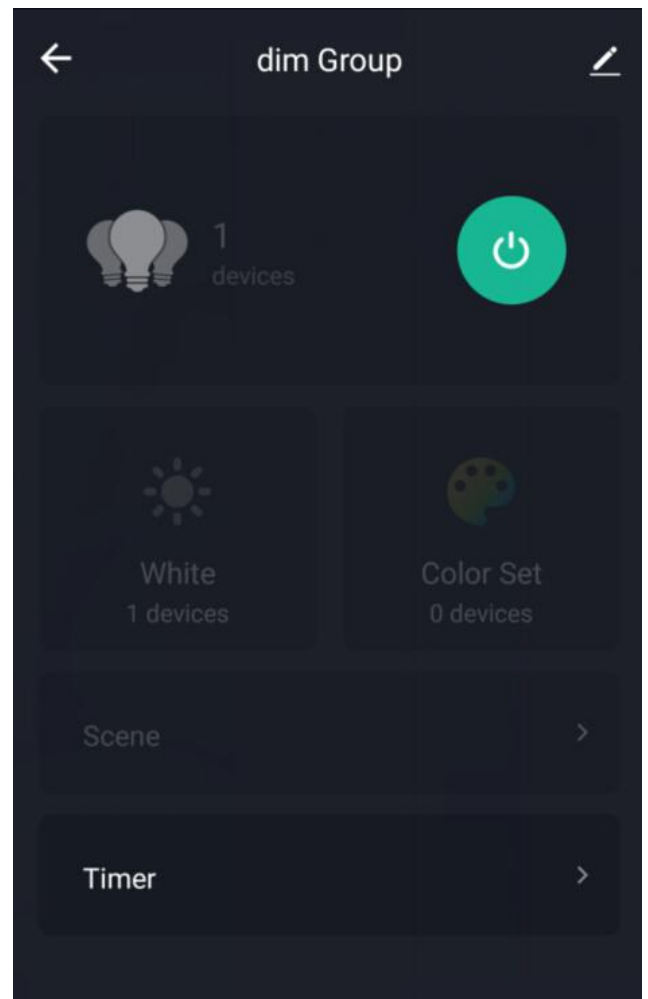

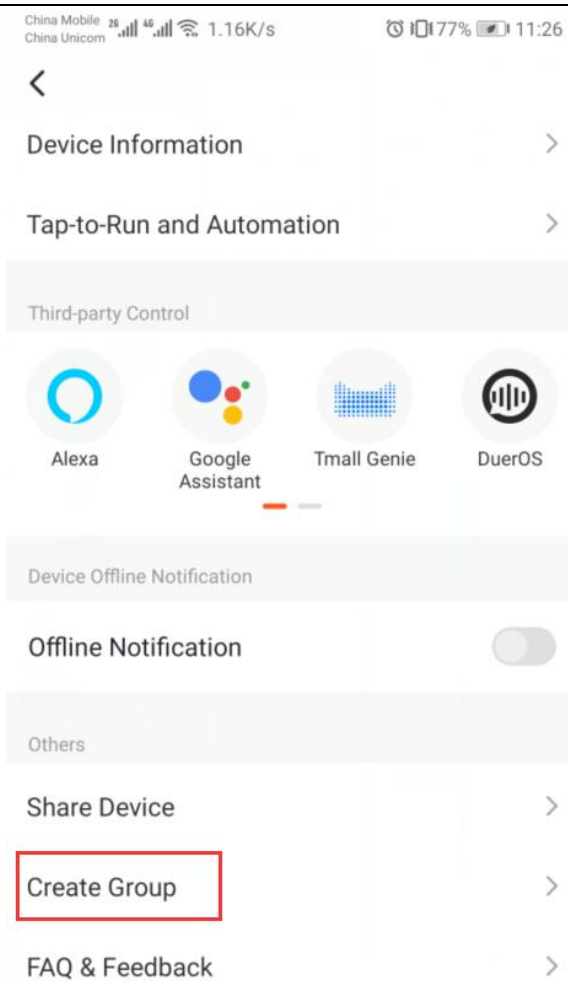

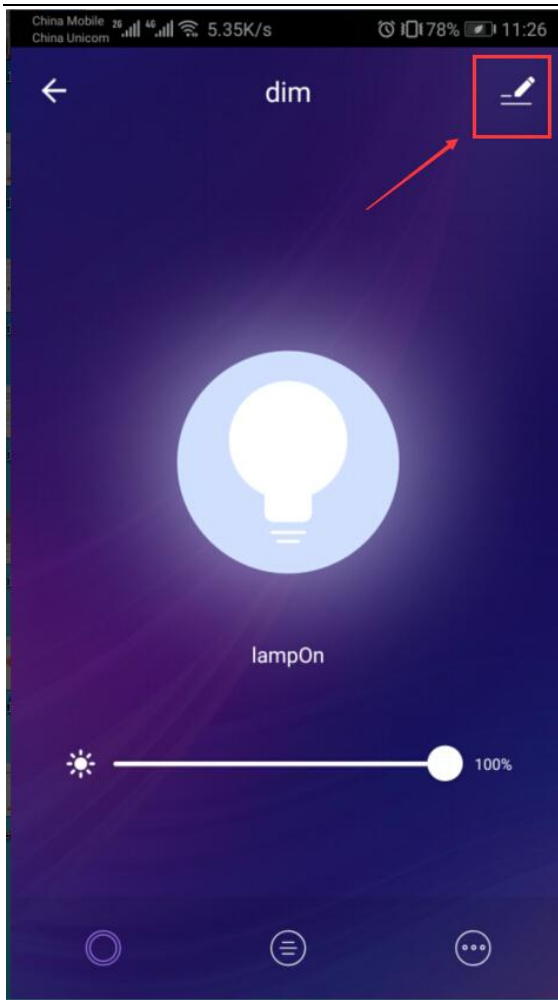

4. Control interface functions.

(1) The APP will automatically identify the type of smart device to display the corresponding control interface (RGB, RGBW, DIM, CCT).

5. Group control function.

Select control interface of one of the controllers, click the “Edit” in the upper right corner, Select “Create Group”, then enter select device interface, “Click” the devices that need set in the group, and then press “Save” to achieve group control.

6. APP voice control.

Click the “voice” control in the upper right corner on the “Home” interface, enter the voice control interface. Please pressing and holding the voice key to speaking, when speaking finished, please release the key, then light will adjust according to the control.

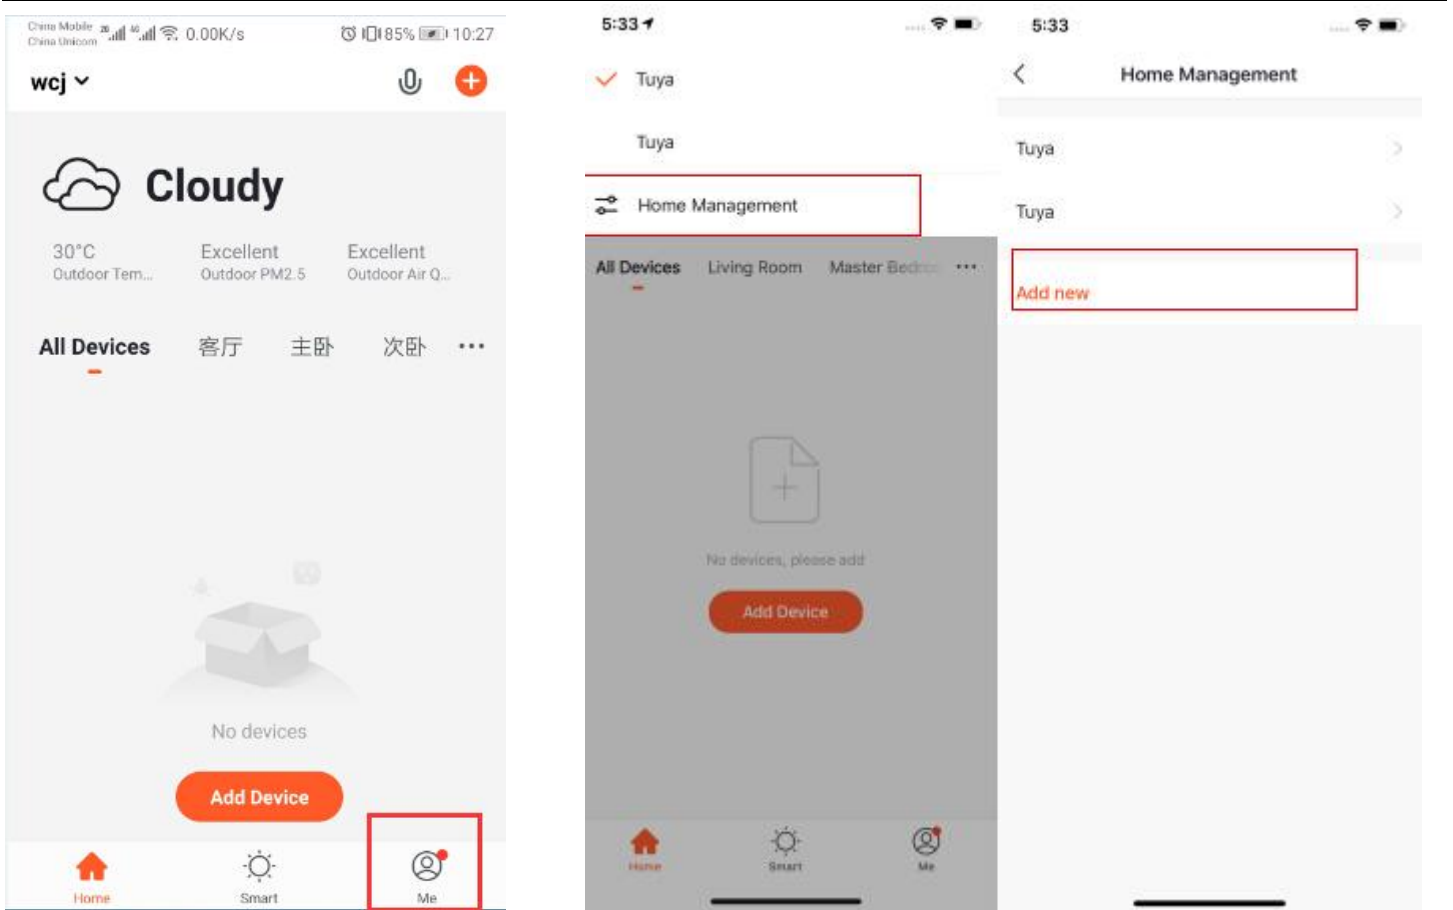

7. Home management

(1) On "Home" interface, Click "Me" in the bottom right corner, then select "Home Management" to edit the existing home or add add in other new home.

One account can control multiple families at the same time, and the smart devices in each family are independent.

You can edit the existing "home" and "add new " through the "home management" button.

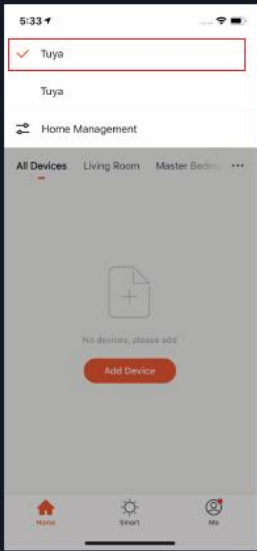

(2) Home member management.

The administrator (the first account who add in the family) has the highest access, can edit and manage the devices, room, intelligence, adding members and so on in the family.

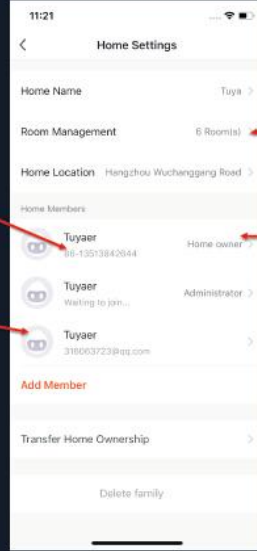

The adding members only could use devices.

During “add member” invitation process, the added member will receive a pop-up message in the App, which could choose "Accept" or "Decline". After the added member “Accept” or “Decline”, administrator will receive the message in the message center.

After the invitation is sent, it will show "waiting to join" before the user agrees to join.

Administrators can click here to invite other people to join this home.

11. Click "Tuya" to enter the Home Settings page, as shown in the pictures.

Here you can edit and manage rooms and devices in the rooms.

The home owner has the highest access and can manage all the devices, rooms, smart automations/scenarios, administrators, and members in the home.

Administrators can manage devices, rooms, smart automations/scenarios and members.

Members can only use devices and smarts.
